

Continental DataGraphics Forms Software Reseller Alliance with Liberty Information Management Solutions

EL SEGUNDO, CA – October 16, 2003 – Continental DataGraphics (CDG) announced today that it has formed a value-added reseller alliance with Liberty Information Management Solutions (Liberty IMS), a leading provider of enterprise information management and web content management software solutions. Under the terms of the VAR agreement, CDG will be able to offer Liberty IMS software to customers as a part of its full service document and information management solutions.

“CDG has long been recognized as a leading provider of information management services to aviation and other industries focused on operation of complex equipment,” said David Malmo, President and CEO of CDG. “Recent expansion in our digital imaging services capabilities requires a more flexible approach to be able to provide document and content management software capable of supporting multiple industries outside of the aviation sector. We are very pleased to form this alliance with Liberty IMS, which will enable CDG to offer its customers a broader spectrum of services for complete end-to-end information management, from initial scanning, capture, and data conversion, to back-end document management systems.”

Lee Triebwasser, Director of Sales, Western Region, of Liberty IMS said, “We are excited about this new alliance between Liberty IMS and CDG because it expands the opportunities for companies looking at full-service information management solutions. With CDG’s Boeing heritage and Liberty’s enterprise-level expertise, customers now have a proven choice for implementing real-world products and services that reduce costs by automating tasks and improving productivity.”

Continental DataGraphics (CDG) is a wholly owned subsidiary of The Boeing Company. Established in 1969, CDG provides a comprehensive suite of products and services for the creation, conversion, management and delivery of information. CDG’s offerings include digital imaging services, technical authoring and illustration, document and content management solutions, and engineering offload services. CDG headquarters are located in El Segundo, CA, with production and customer service facilities located in multiple locations in the U.S. CDG’s European support offices are located in Welwyn Garden City, U.K. and Knaresborough, U.K. For more information, visit www.cdgnow.com.
